Page 5, line 20, delete "thermally conductive".

In the claims:

Please amend the claims as follows:

- a3
1. (Once amended) A [package for a] light emitting die assembly comprising:  
[a leadframe having a cavity, being operative to provide structural integrity;]  
metal leads;  
an insulating body attached to the metal leads, the insulating body having a cavity;  
a [slug] heat sink of a first thermally conductive material, the heat sink separate from  
the metal leads, connected to the insulating body, and positioned [at the base of] relative to  
the cavity for being thermally coupled to a die; and  
  
a lens, positioned [within the leadframe and opposing] relative to the cavity[, being  
operative to provide optical functionality] for transmitting light emitted from the die.
  2. (Once amended) [A package] An assembly, as defined in claim 1, further including a  
submount of a second thermally conductive material, connected to the [slug] heat sink.
  3. (Once amended) [A package] An assembly, as defined in claim 2, wherein the second  
thermally conductive material is selected from [a] the group [that includes] consisting of pure  
materials, compounds, and composites of silver, copper, diamond, silicon, aluminum,  
tungsten, molybdenum, and [beryllia] beryllium.
  4. (Once amended) [A package] An assembly, as defined in claim 1, wherein the first  
thermally conductive material is selected from [a] the group [that includes] consisting of pure  
materials, compounds, and composites of silver, copper, diamond, silicon, aluminum,  
tungsten, molybdenum, and [beryllia] beryllium.
  5. (Once amended) [A package] An assembly, as defined in claim 1, further comprising:
